Study Notes

1. Why does Paul seem to strongly emphasize family, together, and community-like elements in Ephesians?
2. How does a sense of connected or whole community impact the person, the church, the world around us?
3. Paul repeats various uses of power in Ephesians: Gods' power, the Spirits' power, and even for us to have power. How does the power of the born again differ from the power the average follower of God had in the Old Testament?
4. Is all this power something God wants us to experience, understand, and use every day or is it enough to just be aware of it working around us?
5. How much of Ephesians 3:14-21 is focusing on real life personal and communal experience? What verses describe experience at some level or another?
